

## **Introduction to Non-Acute Hospital Profiles**

**Non-acute hospitals** in Massachusetts are typically identified as psychiatric, rehabilitation, and chronic care facilities. CHIA has defined non-acute hospitals in this publication using the Massachusetts Department of Public Health (DPH) and Department of Mental Health (DMH) license criteria.

**Psychiatric hospitals** are licensed by DMH for psychiatric services and by DPH for substance abuse services.

**Rehabilitation hospitals** provide intensive post-acute rehabilitation services, such as physical, occupational, and speech therapy services. For Medicare payment purposes, the federal government classifies hospitals as rehabilitation hospitals if they provide more than 60% of their inpatient services to patients with one or more of 13 diagnoses listed in federal regulations.

**Chronic hospitals** are hospitals with an average length of patient stay greater than 25 days. These hospitals typically provide longer-term care, such as ventilator dependent care. Medicare classifies chronic hospitals as Long-Term Care Hospitals, using the same 25-day threshold.

When presenting trends for utilization, costs, and financial performance, the Center has provided baseline data for each hospital's cohort as a point of comparison. Specialty non-acute hospitals are not identified with a distinct cohort; however, individual specialty non-acute hospital profiles are available.

For detailed descriptions of the data sources and metrics used in the non-acute hospital profiles, please see the Technical Appendix.

### **Psychiatric Hospital Cohort**

Arbour Hospital

Arbour-Fuller Memorial

Arbour-HRI Hospital

Baldpate Hospital

Bournewood Hospital

McLean Hospital

Walden Behavioral Care

Westwood Pembroke Hospital

Whittier Pavilion

**Rehabilitation Hospital Cohort**

Braintree Rehabilitation Hospital

HealthSouth Fairlawn Rehabilitation Hospital

HealthSouth Rehabilitation Hospital of Western Massachusetts

New Bedford Rehabilitation Hospital

New England Rehabilitation Hospital

Spaulding Rehabilitation Hospital of Cape Cod Spaulding Rehabilitation Hospital

Whittier Rehabilitation Hospital Bradford

Whittier Rehabilitation Hospital Westborough

**Chronic Care Hospital Cohort**

Kindred Hospital Northeast

**How to read the non acute hospital report ( images with callouts)**

## How to Read Non-Acute Hospital Profiles

This sheet provides a brief introduction to the metrics on the hospital profiles. Definitions and notes on all metrics are available in the Technical Appendix.

## How to Read Non-Acute Hospital Profiles

Each of the first four graphs compares trends at the featured hospital (in green) to the trend among the peer cohort hospitals (in orange). Both trends are anchored at 100 to emphasize recent changes. The labeled points are cumulative over the time period.

Absolute differences between the hospital and the cohort cannot be read off these graphs, but are available in the data supplement to these reports.
